About Us

AppBundle

User agreement & Privacy agreement >

Application permission description >

Current version 1.0.0.0

User unique identifier 0000000

< Application permission description

In order for AppBundle to provide you with better services, you will need the following device permissions when using it. Before use, we will apply for your authorization, you can in the device system 'Settings - application management or application permission' management to allow, cancel. The specific application permission is as follows:

1) storage: it is used to access the pictures, videos, audio, data files and other contents on your device. It is allowed to use the storage space of the device to provide file download, data storage and other services.

2) SMS: it is used to read and fill the verification code in the SMS when you log in or use the service, which is convenient for quick login or verification.

3) camera: used to provide AR and scanning login services.

4) address book: it is used to access your address book, invite the contacts in the address book to become network disk friends, and provide you with the phone number recharge service in the address book.

5) location: for the purpose of verifying the security of your account, you need to obtain location permission

All the permissions you can set in the system "Settings - application management or application permissions" for the relevant permissions management, the autonomy of the permission, cancel permissions.
